<b>1</b>	<b>To start .....</b>	<b>9</b>
1.1	What are we talking about .....	9
1.2	Shifting Statistics from Physics to Medicine .....	10
1.3	The datasets of our interests .....	10
1.3.1	The iris dataset .....	10
1.3.2	The breastbioert dataset .....	11
1.3.3	The otitis dataset .....	11
1.3.4	The roma dataset .....	12
1.3.5	The cholesterol dataset .....	12
1.3.6	The gossett dataset .....	12
1.3.7	The fresher dataset .....	13
1.3.8	The tooth dataset .....	13
1.4	Which is the best statistical software? .....	13
1.4.1	The R language .....	13
1.4.2	The R language user graphical interfaces .....	14
1.4.3	JASP .....	15
1.5	Remember: data quality is an important issue .....	15

I

## Descriptive Statistics

<b>2</b>	<b>Data Presentation</b>	<b>19</b>
<b>2.1</b>	<b>Background</b>	<b>19</b>
<b>2.2</b>	<b>Descriptive Statistics in JASP</b>	<b>19</b>
2.2.1	Numerical summaries	21
2.2.2	A picture is worth a thousand words	23
<b>2.3</b>	<b>Descriptive Statistics in R</b>	<b>25</b>
<b>2.4</b>	<b>To describe a dataset properly</b>	<b>26</b>
<b>2.5</b>	<b>Recovering descriptive information</b>	<b>27</b>
<b>2.6</b>	<b>First Homework</b>	<b>28</b>

II

## Dealing with Randomness

<b>3</b>	<b>Probability and Medicine</b>	<b>31</b>
3.1	Brief recalls on random variables	31
3.2	Commonly used random variables	32
3.2.1	The Normal Distribution	32
3.2.2	The Lognormal Distribution	36
3.2.3	The Binomial Distribution	37
3.2.4	The Poisson Distribution	38
<b>3.3</b>	<b>Evaluating odds and risks: Bayes theorem</b>	<b>40</b>
3.3.1	Bayes theorem	41
3.3.2	The Bayes factor	42
<b>3.4</b>	<b>From sample to population: inference</b>	<b>43</b>
<b>3.5</b>	<b>Mismatching variability with reliability</b>	<b>45</b>
<b>3.6</b>	<b>Second Homework</b>	<b>48</b>

III

Inferential Statistics

<b>4</b>	<b>T-Test: the history of biostatistics .....</b>	<b>53</b>
<b>4.1</b>	<b>Detecting a signal from noise .....</b>	<b>53</b>
4.1.1	Classical One-sample t test .....	54
4.1.2	Classical Two-sample paired t test .....	56
<b>4.2</b>	<b>Ronald Fisher's idea on significance level .....</b>	<b>56</b>
<b>4.3</b>	<b>Out of the frying pan into the fire: statistical or clinical significance? ..</b>	<b>60</b>
<b>4.4</b>	<b>Absence of evidence, or evidence of absence? .....</b>	<b>60</b>
4.4.1	Bayesian One-sample t test .....	61
4.4.2	Bayesian Paired Samples T-Test .....	62
<b>4.5</b>	<b>In conclusion .....</b>	<b>62</b>
<b>4.6</b>	<b>Exercises .....</b>	<b>63</b>
<b>5</b>	<b>Differences between groups .....</b>	<b>65</b>
<b>5.1</b>	<b>Two groups .....</b>	<b>65</b>
5.1.1	The Student T-Test .....	65
5.1.2	The Welch test .....	67
5.1.3	The Mann - Whitney test .....	69
5.1.4	In conclusion .....	70
<b>5.2</b>	<b>Three or more groups .....</b>	<b>71</b>
5.2.1	The one-way Anova .....	72
5.2.2	The multiple comparison issue .....	73
5.2.3	How to mend heteroskedasticity .....	74

<b>6</b>	<b>Introducing the linear model</b>	79
6.1	Overview	79
6.2	The regression line	79
6.2.1	Measuring point cloud disorder	80
6.2.2	Ordinary least square fitting	81
6.2.3	Toward linear modelling	82
6.2.4	Understanding random effect	82
6.3	The diagnostic of a linear model	83
<b>7</b>	<b>Introducing multivariable analysis</b>	85
7.1	Overview	85
7.2	The Wilkinson and Rogers notation	86
7.3	Ancova	87
7.3.1	Ancova without interaction	87
7.3.2	Ancova with interaction	88
7.4	The Model Selection	89
7.4.1	The Akaike Information Criterion	90
7.4.2	Multiple comparison and AIC	90
7.4.3	A misleading analysis	92
7.5	Fourth Homework	93
<b>8</b>	<b>The logistic regression</b>	95
8.1	The generalized linear model	95
8.2	The logistic regression	95
8.2.1	Analyzing the <code>roma</code> dataset	96

a me ▾

Caro massimo,

ho trovato questa risorsa su nature che molto probabilmente già conoscerai, ma just in case volevo segnalartela perché secondo me contiene parecchi "must-read articles" per i tuoi allievi :)

Un abbraccio, e a risentirci presto per fare piani per il nuovo anno!

G

Collection | 09 May 2017

### Statistics for Biologists

There is no disputing the importance of statistical analysis, but it's often not clear when it may be too late.

This collection highlights important statistical issues that can affect the validity of their work.

*Nature Methods'* [Points of Significance](#) column on statistical analysis, plus an online plotting tool and links to statistics guides from
